

SERVICESCALER PRESENTS

COST RECOVERY FOR PRINT

ServiceScaler deploys print tracking software that allows firms to track and disburse prints, copies, faxes and scans against each matter automatically

WHAT DO WE DO DIFFERENTLY?

ServiceScaler deploys print tracking software that gives firms complete visibility across their team and devices printing provisions. This data allows them to charge their clients for printing in the granular detail that is required to meet cost disclosure requirements.

Because ServiceScaler works exclusively in the legal sector, we understand exactly how to deploy print tracking software to meet the specific needs of law firms.

The firms we work with save costs by using a solution that doesn't come directly from a print provider, and by having the ability to disburse printing costs to their clients versus bearing them internally.

COST RECOVERY FOR PRINT SOLUTION STRUCTURE

COST RECOVERY FOR PRINT JOURNEY
